The Eclipse brings down the final curtain on the limitations of the traditional parasol. Eclipse's flat design results in a cosmic form that creates visual rest. When designing the Eclipse, shade was not the only consideration. Other aspects that merited attention were the creation of an attractive and functional design that could be put into use quickly and easily.

FR/ Grâce au modèle Eclipse, les limites du parasol traditionnel sont désormais de l'histoire ancienne. Le design plat d'Eclipse lui confère une allure cosmique ayant un véritable impact visuel. Lors de la conception d'Eclipse, l'ombre ne fut pas le seul point d'attention. D'autres aspects tout aussi importants résidaient dans la création d'un design à la fois attrayant et fonctionnel, facile et rapide à mettre en œuvre.

DE/ Mit dem Eclipse-Schirm gehören die Beschränkungen der klassischen Sonnenschirme definitiv der Vergangenheit an. Das flache Design des Eclipse-Schirms resultiert in einer kosmischen Form, die visuelle Ruhe kreiert. Beim Entwurf des Eclipse-Modells haben wir uns jedoch nicht nur auf die Aufgabe als Schattenspender konzentriert. Ein weiterer wichtiger Aspekt war die Schaffung eines attraktiven und funktionellen Designs für einen schnellen und einfachen Gebrauch.

NL/ De Eclipse reikt verder dan de beperkingen van de traditionele parasol. Het vlakke ontwerp van de Eclipse roept een kosmische vorm op die een visuele rust uitstraalt. Bij het ontwerp van de Eclipse was schaduw niet het enige doel. De aandacht ging ook naar het creëren van een aantrekkelijke maar functionele parasol die u snel en gemakkelijk opstelt.

IT/ Con Eclipse cala definitivamente il sipario sui limiti dell'ombrellone tradizionale. Il design piatto di Eclipse genera una forma cosmica che crea equilibrio e benessere visivo. Nella progettazione di Eclipse, l'ombra non è stata l'unica considerazione. Altri aspetti che hanno richiesto attenzione sono stati la creazione di un design attraente e funzionale da poter usare in modo rapido e semplice.

ES/ Con la Eclipse se baja el telón de las sombrillas tradicionales. El diseño plano de la Eclipse resulta en una forma cósmica que crea un descanso virtual. La sombra no fue la única consideración a la hora de diseñar la Eclipse. Otro aspecto que se mereció atención fue la creación de un diseño atractivo y funcional que se pudiera utilizar rápida y fácilmente.

Why are you always looking at the least attractive side of a parasol? Why is the serenity disturbed by the busyness of ribs and stretchers? Infina proves that it does not have to be that way. This parasol is not only visually very restful, but it also scores significantly better than the traditional parasol in terms of wind resistance. Clear evidence that aesthetics can, indeed, be combined with sustainability. And that one can always do things better.

FR/ Pourquoi regardons-nous toujours les aspects les moins attrayants du parasol ? Pourquoi l'omniprésence de côtes et de baleines vient-elle perturber notre sérénité ? Infina démontre qu'il ne doit pas en être ainsi. Ce parasol est non seulement très sobre visuellement, mais sa résistance au vent est également bien meilleure que celle d'un parasol traditionnel. Une preuve évidente que résistance et esthétisme peuvent cohabiter. Ce parasol se révélera toujours le plus performant...

DE/ Warum blickt man stets auf die am wenigsten attraktive Seite eines Sonnenschirms? Warum wird die Klarheit von unruhigen Streben und Stangen unterbrochen? Infina beweist, dass es nicht so sein muss. Dieser Sonnenschirm strahlt nicht nur eine visuelle Ruhe aus, sondern hat auch eine wesentlich bessere Windbeständigkeit als klassische Sonnenschirme. Ein klarer Beweis dafür, dass Ästhetik sich tatsächlich mit Strapazierfähigkeit kombinieren lässt. Und dass man immer alles noch besser machen kann.

NL/ Waarom kijken we altijd naar de minst aantrekkelijke kant van een parasol? Waarom verstoren de drukke baleinen en een baleinhouder elk gevoel van rust? De Infina laat zien dat het ook anders kan. Deze parasol is niet alleen visueel zeer rustgevend, maar scoort ook aanzienlijk beter op het vlak van windweerstand in vergelijking met een traditionele parasol. Het overduidelijke bewijs dat esthetiek en duurzaamheid hand in hand kunnen gaan. En dat het dus altijd beter kan!

IT/ Perché si guarda sempre il lato meno attraente di un ombrellone? Perché la bellezza viene compromessa dalla presenza di stecche e tenditori? Infina dimostra che tutto ciò può essere diverso, con un ombrellone non solo molto piacevole esteticamente, ma nettamente superiore a un ombrellone tradizionale in termini di resistenza al vento. Prove chiare che l'estetica può essere senza dubbio coniugata con la tecnica. Per fare cose sempre più innovative.

ES/ ¿Por qué siempre observamos el lado menos atractivo de una sombrilla? ¿Por qué se perturba la serenidad con elementos como varillas y tensores? La Infina prueba que esto no tiene por qué ser así. Esta sombrilla no solo es visualmente relajante, sino que también ofrece mejores prestaciones que la sombrilla tradicional en materia de resistencia al viento. Una clara evidencia de que lo estético también se puede combinar con la durabilidad y de que uno siempre puede hacer mejor las cosas.

BUNDL

Icarus was designed as a confluence of the primitive need to create shade and the requirements of contemporary society. Bundl has combined the simplicity of the natural leaf that offers protection with an intuitive, well conceived mechanical system and high-quality materials. This product distinguishes itself from the more traditional, mechanical shade systems by its simplicity. Its beauty gives shade an additional dimension.

Bundl combineerde de eenvoud van een beschermend, natuurlijk blad met een intuïtief, doordacht mechanisme en hoogstaande materialen. If you do not want to have any obstacle in the middle of a parasol, you need a design process that questions everything. That means that you will not end up with the run-of-the-mill parasol that we have long been familiar with. The Spectra is not only breathtakingly beautiful thanks to its flat design, but it is also functionally pioneering with its fan principle, which closes the parasol horizontally rather than vertically. With its no-compromise and minimalist design, it adds the finishing touch to gardens and patios under all conditions.

FR/ Pour n'avoir aucun obstacle au milieu du parasol, il faut inévitablement tout remettre en question lors de la conception. Il faut donc oublier ce banal parasol que nous ne connaissons que trop bien. Le design aplati du Spectra le rend non seulement absolument magnifique, mais ce système d'ombrage est également très avant-gardiste sur le plan fonctionnel grâce à son principe d'éventail fermant le parasol horizontalement et non verticalement. Au travers de son design affirmé et minimaliste, ce parasol apporte la touche finale aux cours et jardins, quelles que soient les conditions.

DE/ Wenn man kein einziges Hindernis in der Mitte eines Sonnenschirms haben möchte, benötigt man einen Designprozess, der alles in Frage stellt. Dabei wird am Ende nicht einer dieser 08/15-Schirme herauskommen, wie wir sie lange gekannt haben. Der Spectra-Schirm ist dank seines flachen Designs nicht nur atemberaubend schön, sondern mit seinem Fächerprinzip, mit dem der Sonnenschirm horizontal statt vertikal geschlossen wird, auch in funktioneller Hinsicht bahnbrechend. Mit seinem kompromisslosen und minimalistischen Design verleiht er Gärten und Terrassen den letzten Schliff - in jeder Situation.

NL/ Wil je elk obstakel uit het midden van een parasol bannen? Dan moet je tijdens de ontwerpfase werkelijk elk detail in vraag stellen. Het resultaat? Een parasol die in niets lijkt op de alledaagse parasols waarmee we zo vertrouwd zijn. De Spectra is adembenemend mooi dankzij zijn vlakke ontwerp en baanbrekend functioneel dankzij het waaiersysteem. Met dit systeem vouwt u de parasol niet verticaal maar horizontaal dicht. De compromissloze uitstraling en het minimalistische ontwerp geven uw tuin of patio een echte finishing touch, ongeacht de weersomstandigheden.

IT/ Per non avere intralci al centro del ombrellone, è necessario un processo di design che metta tutto in discussione. Ciò significa che alla fine non sarà il solito ombrellone che conosciamo da sempre. Spectra non è soltanto di una bellezza mozzafiato grazie al design piatto, ma prevede anche un funzionamento all'avanguardia con il principio del movimento a ventaglio che chiude l'ombrellone in orizzontale anziché in verticale. Il suo design minimalista e senza compromessi aggiunge un tocco raffinato al giardino e al patio, in qualsiasi situazione.

ES/ Si usted no desea encontrarse con un obstáculo en el centro de la sombrilla, necesita un proceso de diseño que lo cuestione todo. Eso significa que no obtendrá la sombrilla a la que hemos estado acostumbrados durante mucho tiempo. La sombrilla Spectra no solo es impresionantemente bonita por su diseño plano, sino que además es funcionalmente pionera con su principio de abanico gracias al cual la sombrilla se cierra horizontalmente y no verticalmente. Su diseño poco comprometido y minimalista aporta el toque final a jardines y patios de cualquier tipo.

'SIMPLICITY IS
THE ULTIMATE
SOPHISTICATION'

PARAFLEX®

BY UMBROSA

7.0

In 1999, Peter Leleu conceived of the Paraflex as the solution for a problem that he was confronted with every day of his life... parasols that caught the wind and flew off. A practical, hands-on design that has proven attractive for both the project sector and private individuals. Peter currently heads up sales at Umbrosa.

PETER LELEU

Parasols often have to contend with wind. Peter brought the traditional parasol design into question and designed a parasol brace for mounting on walls or the sides of poles. The result has a number of strengths: a strong, light and space-saving solution that provides maximum shade thanks to its adjustable arm. Twelve years later, Paraflex has become a timeless parasol that is proving its worth around the world every day.

FR/ Les parasols sont souvent soumis à des vents violents. Peter a remis en question le design traditionnel du parasol et a conçu un pied de parasol destiné à être fixé aux murs ou sur les flancs de poteaux. Le résultat présente de nombreux points forts : une solution robuste, légère et peu encombrante, offrant un maximum d'ombre grâce à son bras ajustable. Douze ans plus tard, Paraflex est devenu un parasol intemporel faisant ses preuves chaque jour dans le monde entier.

DE/ Sonnenschirme müssen häufig starken Winden standhalten. Peter hat das klassische Sonnenschirmdesign in Frage gestellt und einen Mast zur Montage an der Wand oder den Seiten von Konsolen geschaffen. Das Ergebnis hat eine Reihe von Vorteilen: eine stabile, leichtgewichtige und platzsparende Lösung, die dank des einstellbaren Arms maximalen Schatten bietet. Zwölf Jahre später hat sich der Paraflex zu einem zeitlosen Sonnenschirm entwickelt, der seinen Wert jeden Tag auf der ganzen Welt unter Beweis stellt.

NL/ Parasols hebben vaak te kampen met windvlagen. Peter stelde het traditionele parasolontwerp in vraag en ontwierp een parasolsteun die u aan de muur of de zijkant van een paal kunt monteren. Het resultaat heeft tal van troeven: deze sterke, lichte en plaatsbesparende oplossing zorgt voor een maximale schaduw dankzij de verstelbare arm. Nu, twaalf jaar later, is de Paraflex een tijdloze parasol die overal ter wereld zijn nut bewijst.

IT/ Spesso gli ombrelloni devono competere con venti forti. Peter ha messo in discussione il design tradizionale dell'ombrellone e ha concepito un apposito sostegno per il montaggio a parete o sui lati del palo. Il risultato presenta numerosi vantaggi uniti in una soluzione salvaspazio robusta e leggera capace, grazie al suo braccio regolabile, di creare varie zone d'ombra. Dodici anni dopo, Paraflex è diventato un ombrellone senza tempo, che ogni giorno dimostra il proprio valore in tutto il mondo.

ES/ Las sombrillas suelen tener que enfrentarse a la fuerza del viento. Peter cuestionó el diseño tradicional de la sombrilla y diseñó un brazo de sombrilla para montar en paredes o laterales de postes. El resultado presenta diversas ventajas: se trata de una solución resistente, ligera y que ahorra espacio. Además, ofrece una sombra máxima gracias a su brazo ajustable. Doce años después, la Paraflex se ha convertido en una sombrilla atemporal que prueba su valía a diario en todo el mundo.
